# “Action photographs (verbs)”

Ref. 20506

FOR EDUCATIONAL PURPOSES

## ACTION PHOTOGRAPHS (VERBS)

Ref. 20506

### CONTENTS:

54 photographs of everyday ACTIONS carried out by a variety of individuals.

The actions chosen are familiar to the child; they may perform them themselves or they may be habitual in the world around them. To encourage the child to express him or herself, we recommend making the people who appear in the photos more familiar to the child by giving them actual names or a family relationship, e.g., daddy, mummy, granny, etc.

To make it easier to locate the photos, a list of all the actions is given on the last page with their corresponding photo number.

### RECOMMENDED AGES:

From 3 to 8 years.

Up to the age of 3, they encourage young children to talk. From ages 3 to 6 they help children to structure language and acquire a vocabulary and from 6 onwards they make it possible to enrich that vocabulary and assimilate complex linguistic structures.

These photos can be used to teach a second language at oral level. They encourage the acquisition of vocabulary and the learning of complex linguistic structures in a way that is easy for the child and straightforward for the teacher. On the last page of the guide is a vocabulary list of the photo contents in 9 languages, making translation from one language to another easier.

### EDUCATIONAL OBJECTIVES:

Encouraging and enriching language use: These photographs make it easy to learn language naturally. They help to create a stimulating environment that motivates the child to use language in speaking and listening to others in conversations (between teacher-student, parent-child, student-student and in small groups). In this way, comprehension and oral expression are enriched by means of using language in situations that are motivational for the child.

## ACTIVITIES:

### DEVELOPMENT OF LISTENING SKILLS

- Listening to the adult while he/she goes through the photos and says the action or verb that appears in each one out loud.

### ENRICHING VOCABULARY

- Identifying the actions shown by following the instruction: point to, give me, pick up, show me, the photo in which the little boy (or little girl, etc.) is doing "x" or "y" action.
- Saying the name of the actions taking place in the photos shown to him/her by responding to the question "what is he/she doing?", which the child should answer with the infinitive form of the verb.
- Completing a sentence with the action being carried out by the person in the photo: the child with the book in his hands is ... (using the gerund form of the verb).

### IMPROVING

### IMPROVING VERBAL COMPREHENSION

- Listening to the description of a photo and naming the action that corresponds to it.
- Pointing out one of two photos shown in answer to a negative question: e.g., show me the photo in which the child is not sweeping.

### CONSTRUCTING SENTENCES

- Repeating simple sentences that describe the action: the child sweeps, or the child is sweeping.
- Responding to question such as: what is the child doing? with a sentence like the one above.
- Responding to questions relating to two or more actions with sentences similar to those above.
- Responding to questions on the child's own experience in relation to the action taking place in a photo.
- Constructing short sentences that relate or describe 2 or 3 actions using demonstratives (this, that, those, etc.).
- Constructing short stories with 2 or 3 photos relating the actions and the individuals that appear in them.

### LOGICAL REASONING

- Choosing from among various photos the one that is missing to complete a group.
- Picking out from among various photos the one that is not related to the others.

## VISUAL MEMORY

- The child looks at 3, 4, 5 or more actions; the photos are then mixed up with the others and the child has to pick out the original ones.
- The child looks at 3, 4, 5 or more actions laid out in a specific order. They are then mixed up and the child has to rearrange them in their original order.
- The child looks at 3-7 photos for a few seconds. They are then turned face down and the child has to point out each action, saying its name out loud. They can be turned over to check if he/she was right.

## AUDITORY MEMORY

- The child listens to the names of 3-5 actions and then selects the photos corresponding to those actions and places them in the right order.

## LEARNING A SECOND LANGUAGE AT ORAL LEVEL

- All the activities suggested above can be carried out in a second language being learnt by the child.
