1 DRILL

Ø79

Drill a hole

2 INSERT
Insert grommet into the hole, then feed the plug all the through the threaded fastening nut.

3 TURN CLOCKWISE & PLUG IN
Turn the fastening nut as far up the thread as possible. Make sure that it has been thoroughly tightened. Plug the Schuko plug into a wall socket or powerstrip of your choice. Lastly, connect the the USB-C cable to intended device.

30 mm maximum

Note! The fastening nut has 3 holes for fixing with wood screws.

A ADJUSTING HEIGHT
Connect plug to Powerdot to begin releasing the inner part of the grommet.

B RELEASE INNER PART
Rotate plug counter-clockwise to release the innert part.

C ADJUSTING HEIGHT
The inner part should now be loose. Adjust to desired level - see box: ADJUST LEVELS

Note! Pay attention to the locking geometry as it will help with adjusting the inner part to the desired level.
